Latest Updates on Energy & Climate

Our third edition of The Regulation of the Power Sector online course starts today!

After having great success in the first editions of our online course the Regulation of the Power Sector, we are happy to announce that the 3rd edition starts today!

20 January 2016

TSE Debate: Energy Transition

A poorly understood success story: the European carbon market

The smoke rising from COP21 on 12 December 2015 was more grey than white. Habemus pactum! It's better than nothing, but the smoke above Paris still contains high particle counts and greenhouse gases. Like everyone else,

Specialised Training on the Regulation of Gas Markets

The Florence School of Regulation invites you to the next edition of the Specialised Training on the Regulation of Gas Markets, from the 14-18 March, 2016.

This 5-day residential training in Florence provides:

- The basic principles of gas regulation and the most topical issues in Europe and worldwide
- Academics and executives' perspective on the gas markets
- Active learning: interactive methods, real-life problems, lively discussions
- Numerous opportunities for networking

Listen to Sergio Ascari and Ilaria Conti, Course Co-directors, talking about the current challenges in European gas markets.

Training on the Regulation and Integration of Renewable Energy

FSR's new training on the Regulation and Integration of Renewable Energy will provide a comprehensive and detailed view of the European regulatory framework for the integration and development of renewable energy from top European experts.

Get specialist insight into:

- What is renewable energy for industry stakeholders and the technical impacts for the integration
- The European regulatory framework for renewable energy
- Costs and macro/micro-economic impacts of renewable energy
- The European electricity target model in a renewable energy future
- Investing in renewable energy in Europe

Deliverables

	Deliverable	Month
7.1	Project website with dedicated access to project partners	03
7.2	Project brochure and other project presentation materials	03
7.3	Newsletters published twice a year	
7.4	Three Scientific Papers	12,24, 36
7.5	Workshop conclusions and recommendations (text or video format)	36
7.6	Final project exploitation plan	36
7.7	Impact assessment of the results of the SmartNet project	36

D7.1: Website

- First material: Video interviews and pictures
- Input for content?

D7.2: Project brochure and other project presentation materials

- Project brochure (ready by M03)
- Power point and Word template
- 1-2 Roll-up banners to be sent to RSE
- Interim reports?

Project Identity

- Corporate Identity
- Logo: To be selected **now** by work package leaders.

Social Media

- Social Media (Twitter + LinkedIn)
- FSR communication channels
 - Create a new mailchimp account for the project and then share it with the partners and among their contacts, inviting people to subscribe

D7.3: Newsletter

- Newsletter
 - Template will be prepared
 - To be released twice a year (June and December)

D7.4: Scientific Papers

- 1 Policy Brief by FSR
- Academic papers by project partners

D7.5: Events

- Three project workshops
 - With regulators (in Florence): Date to be decided **now**.
 - With TSOs and DSOs
 - With academics
- 3 workshops for the demonstrations. **Who will organize them?**
- 1 or 2 Webinars + 1 online debate

D7.6: Final Exploitation Plan

Danske Commodities

D7.7: Impact Assessment

- To be discussed later

D8.1:

Project quality management plan [EUI M03]

Quote: “

- A Quality Management Plan (based on ISO 9001 and 14001) will be prepared by the Quality Manager and fixed by the Project Executive Board at the latest by month 3: it will include all the project procedures (information, reporting, dissemination, etc.).
- EUI will be committed with the Quality Manager role. Simple output indicators will be developed for each work package and demonstrations with the aim to monitor the degree of achievement of each task.
- The quality control will consist of a Quality Review, managed by the Quality Manager and by the Coordinator, to monitor the quality of documents while being developed and an Approval Procedure that will allow each Partner verifying the quality of the results and ensure that their specific objectives are achieved.
- Public deliverables, public project documents, patent applications, and invention disclosures will be submitted to the Quality Review and to the Approval Procedures.”
