

Hub Programme
DAY : 5th October 2017 (09:30-13.00)

Location: Grid Intelligence Hub theater

Title of session: SmartNet a European project investigating TSO-DSO coordination for acquiring ancillary services from distribution networks

Chairperson: Gianluigi Migliavacca, RSE

09.30-09.50	The SmartNet project after one-and-a-half year of activities <i>Speaker: Gianluigi Migliavacca (RSE)</i>
09.50-10.10	A simulation environment for analysing ancillary services from distribution grids <i>Speaker: Marco Rossi (RSE)</i>
10.10-10.25	Modelling real-time markets <i>Speaker: Guillaume Leclercq (N-SIDE)</i>
10.25-10.40	The role of aggregators <i>Speaker: Mario Džamarija (DTU)</i>
10.40-10.55	Real time markets and arbitrage with previous market sessions <i>Speaker: Miguel Marroquin (ONE)</i>
10.55-11.10	Afternoon Coffee Break
11.10-11.30	A cost-benefit analysis approach for analysing TSO-DSO coordination schemes <i>Speaker: Carlos Madina (TECNALIA)</i>
11.30-11.50	Italian Pilot: monitoring and control of distribution resources from the transmission <i>Speaker: Luca Ortolano (TERNA)</i>
11.50-12.10	Danish Pilot: flexibility resources from indoor swimming pools <i>Speaker: Loui Algren (ENERGINET.DK)</i>
12.10-12.30	Spanish Pilot: Flexibility resources from radio base stations for telecommunication <i>Speaker: Miguel Pardo (ENDESA)</i>
12.30-13.00	Panel Discussion: How to organize efficient ancillary services markets in the DER age Moderator: Gianluigi Migliavacca (RSE) Panelists: same people as the speakers
